

HIMANSHU SHARMA

Technology & Governance Professional | Digital Transformation | Process Improvement

PROFESSIONAL SUMMARY

Technology professional with 5 years of experience across Infosys and Tata Consultancy Services in cloud infrastructure, digital transformation, process automation, technology governance, cost optimization, and IT operations.

Experienced

in identifying operational challenges, analysing data and performance metrics, automating processes, optimizing resources, and coordinating with cross-functional

stakeholders to deliver reliable outcomes.

Strong interest in public-sector governance, citizen-centric service delivery, digital

governance, and technology-enabled development. Complementing professional technology experience with leadership as President of the Computer Science Engineering Society, community involvement as an NSS Student Volunteer, and recognition in technical innovation and debate competitions.

Seeking to apply analytical thinking, technology expertise, leadership, communication,

and problem-solving skills to contribute to eActive and citizen-focused governance

through the CMGGA program.

SELECTED PROFESSIONAL IMPACT

Process Automation: Automated infrastructure provisioning, deployments, resource management, and recurring operational activities to reduce manual eAort.

Resource Optimization: Applied monitoring, rightsizing, scheduling, and cost analysis

to improve utilization and control cloud expenditure.

Technology Governance: Worked with governance policies, compliance controls, access management, and standardized infrastructure processes.

Data & Analytics: Used system metrics, monitoring tools, and cloud analytics to identify issues, evaluate performance, and support operational decisions.

Service Delivery: Managed incidents, changes, deployments, and infrastructure operations with a focus on reliability and timely resolution.

Leadership & Collaboration: Led student technical activities and worked across multiple professional teams and stakeholders to execute projects and resolve problems.

PROFESSIONAL EXPERIENCE

INFOSYS

Senior Systems Engineer – DevOps Engineer

Jul 2022 – Aug 2025

- Managed technology infrastructure and deployment processes across development, staging, and production environments, ensuring reliable delivery of applications and services.

- Automated infrastructure provisioning using Terraform and Azure DevOps, reducing deployment time by approximately 50% and improving consistency.

- Designed and optimized automated workflows for application build, testing, deployment, and infrastructure management, reducing manual intervention and improving operational eAiciency.

- Developed automation for resource cleanup, VM rightsizing, and scheduled shutdown/startup, improving resource utilization and supporting cost eAiciency.

- Implemented FinOps practices to monitor cloud usage, analyze expenditure, identify ineAicient resource utilization, and support cost optimization.

- Used Prometheus and Grafana for monitoring and analytics to identify performance bottlenecks and improve system reliability.

- Managed incidents, service requests, and changes, applying root-cause analysis

to resolve infrastructure, deployment, and application issues.

- Managed Azure infrastructure including virtual machines, storage, networking, load balancers, application gateways, and databases.

- Implemented Azure Site Recovery to strengthen disaster recovery and business continuity.

- ✓ Developed automation scripts using PowerShell and Python to reduce repetitive manual tasks and improve operational efficiency.
- ✓ Worked with multiple development, QA, and infrastructure teams to coordinate deployments and resolve operational issues.
- ✓ Managed containerized applications using Docker and Kubernetes, including deployments, scaling, updates, and rollbacks.
- ✓ Used Azure monitoring and Azure Advisor recommendations to identify opportunities for performance and resource optimization.

TATA CONSULTANCY SERVICES (TCS)

Assistant Systems Engineer – CloudOps Engineer

Nov 2020 – Jul 2022

- ✓ Managed and monitored Azure, AWS, and on-premises infrastructure to maintain reliable technology operations and minimize service disruptions.
- ✓ Provisioned and managed Azure services including Virtual Machines, VNets, Storage Accounts, Network Security Groups, and Key Vault.
- ✓ Supported technology governance and compliance using Azure Policy, Azure Blueprints, and Azure Security Center.
- ✓ Conducted infrastructure reviews and audits to ensure adherence to organizational and regulatory requirements.
- ✓ Managed cloud expenditure using Azure Cost Management, identifying opportunities through rightsizing and scheduling optimization.
- ✓ Automated recurring operational activities using Azure Runbooks, reducing manual effort and improving process efficiency.
- ✓ Collaborated with development and QA teams to coordinate deployments across Dev, QA, and Production environments.
- ✓ Managed incidents, service requests, and changes while maintaining communication with relevant stakeholders.
- ✓ Supported access management through Active Directory and maintained secure access controls.
- ✓ Managed Azure Key Vault for secure storage of organizational secrets, keys, and certificates.
- ✓ Supported server patching, maintenance, and infrastructure operations across Azure and VMware environments.

LEADERSHIP & SOCIAL SERVICE

NATIONAL SERVICE SCHEME (NSS)

Student Volunteer

- ✓ Participated in social-service and community-oriented activities through NSS.
- ✓ Contributed to community engagement activities and developed an understanding of teamwork, social responsibility, and service-oriented initiatives.

COMPUTER SCIENCE ENGINEERING SOCIETY

B.R.C.M. College of Engineering & Technology

President | Sep 2018 – Dec 2019

- ✓ Led the Computer Science Engineering Society and coordinated activities involving students and faculty.
- ✓ Organized and supported technical and student-focused activities, demonstrating leadership, planning, coordination, and team management.

Technical Coordinator | Sep 2017 – Sep 2018

- ✓ Coordinated technical activities and supported organization of events and initiatives for the student community.
- ✓ Worked with peers to plan and execute technical activities and encourage student participation.

HONORS & ACHIEVEMENTS

Inter-University Debate Competition – 1st Place

B.R.C.M. College of Engineering & Technology | Sep 2017

- ✓ Won first place in an inter-university debate competition, demonstrating strong communication, critical thinking, research, argumentation, and ability to articulate and defend viewpoints.

Technical Exhibition – Engineers' Day – 1st Prize

B.R.C.M. College of Engineering & Technology | Sep 2019

- ✓ Won first prize for a project combining Object Detection and Face Recognition,

demonstrating the practical application of technology to real-world identification and interaction challenges.

TCS Inframind Competition – Top 10 Finalist

TCS CBO | Jan 2019

- ✓ Project selected among the Top 10 finalists in the TCS Inframind competition focused on automation, AI/ML, and virtualization.
- ✓ Developed an innovative technology solution aimed at improving infrastructure management and automation.

Technical Exhibition – Engineers' Day – 2nd Prize

B.R.C.M. College of Engineering & Technology | Sep 2018

- ✓ Won second prize for developing a Facial Recognition Attendance System designed to automate attendance tracking and improve efficiency and accuracy.

CERTIFICATIONS

- ✓ Microsoft Certified: DevOps Engineer Expert (AZ-400)
- ✓ Microsoft Certified: Azure Administrator Associate (AZ-104)
- ✓ Infosys Certified Associate – Infrastructure as Code using Terraform
- ✓ Linux Specialization – Linux Foundation

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science

B.R.C.M. College of Engineering & Technology

CGPA: 7.7 / 10
